

# The Intelligent Anchoring System

**The Gripple / Fenox Anchor solution is a pioneering approach to anchoring into hard, rocky ground.**

The unique anchor design can be driven into tough, rocky ground more easily and quickly than other methods and the ingenious internal spike system ensures a secure anchor point.

Combine this with the fast and easy to install Gripple GPAK, to brace between your end post and anchor point, and the result is a fast, secure and durable anchoring solution.

The Fenox / GPAK Anchor Kits come complete with the anchor, the bracing extension bracket and the bracing kit. All you need for a superior anchoring installation to last for many years.

# Anchoring made easy

## The new Universal Gripple Plus Anchor Kits (GPAK) are ideal for use in vineyards or orchards.

The Gripple Kits complete with a length of heavy galvanised steel wire rope, with a pre-ferruled loop for fast installation around wooden posts.

Alternatively on metal posts, simple push the end fixing through a pre-drilled post hole and secure the kit with the washer provided.

Two size are available dependent on your application:

- GPAK 3 at 400 kg and 4,5metres of wire rope
- GPAK 4 at 600 kg and 5,0metres of wire rope
